

### **Consolidated Payment Gateway (CPG)**

Multi-national companies with thousands of employees, distributors and their members located throughout the world, require an efficient and cost effective method for both making monetary payouts and receiving funds. Global Payout has introduced “**MoneyTrac**”, the most efficient, industry leading web based payment system. MoneyTrac is fully scalable and currently available in over 180 countries. With MoneyTrac, multi-national companies can now take advantage of unified access to the Consolidated Payment Gateway (CPG) currently processing over \$40B of transactions per year.

Unlike many competitors, MoneyTrac is instantaneous. Companies can upload funds in real-time to web-based accounts and provide individuals multiple options on receiving money.

#### **Payouts:**

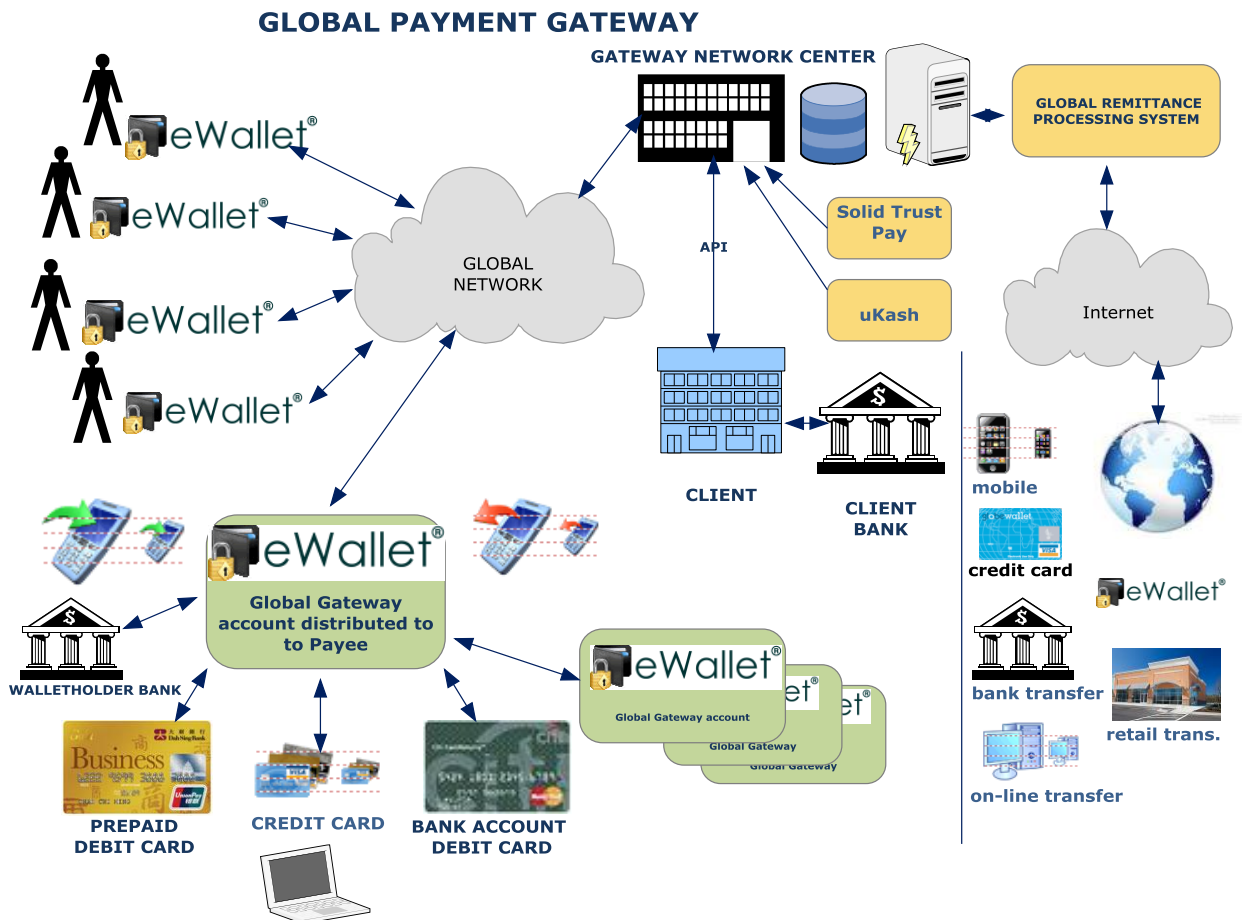

- Payments to **Credit Cards** and **Debit Cards** – Global Payout along with Visa and MasterCard, have created the ability to transfer funds to virtually every card in the world. Individuals can get paid as long as they have one of these branded cards issued by any bank globally.
- Payments to a **Prepaid Debit Card** – for those individuals who don’t have a credit or debit card, or they want access to their funds in real-time, they can order a MoneyTrac Prepaid Discover Card in the U.S. or international residents can apply for a Prepaid MasterCard and offshore bank account.
- Payments to a **Bank Account** – funds can be transferred to a payee’s checking or savings account via electronic funds transfer throughout the world from their MoneyTrac account. Whether the payee is located within the European Union, Asia, India, the United States or other countries throughout the world, transfers can be made through the CPG on a timely basis and at the lowest cost.

**Pay-Ins:** (A lower cost solution for Direct Sales companies to offer their affiliate members with an optional choice to pay for product and services other than credit and debit cards.)

- **Debit of U.S. Bank Account** via ACH and funds are transferred to their MoneyTrac CPG web-based account.

- **Debit of International Bank Accounts** in those countries payment relationships exist and volumes permit.
- **Debit of Payment Processor Accounts** – Solid Trust Pay is available and others are being added as required internationally.
- **Cash Loading** – UKash (an international cash loading network) is available and others are being added as required internationally
- **Company Integration** - through our application program interface (API), the CPG will be tightly integrated with the client's payment system to provide a seamless means of paying out to their people as well as receiving pay-ins as required by the business needs.

## **Why MoneyTrac?**

- It can help your company retain its competitive position and grow by providing multiple flexible payment solutions anywhere in the world
