Message from Dr. Andrew Lim

Chief Executive Officer, Maxim Capital Limited

马胜资本有限公司执行长 Andrew Lim 博士献词

A very warm welcome to Maxim Capital's Inaugural IME 2013 Macau which is the result of 10 months of sheer determination, belief and hard work by our pioneering members to bring Maxim's platform and business model to the world.

IME 2013 presents an excellent opportunity for us to get acquainted with partners from other countries, exchange views, share market knowledge and learn from like-minded business people. Maxim has also invited world renowned authors, platform speakers and financial experts to give us a better understanding of the fast paced, ever changing and dynamic financial world that we trade in. I believe this will help us make better decisions, build quality teams and support our business associates to make them even more successful than they already are.

The next few days will be a starting point and springboard to achieve the aspirations that you have set for yourself, your family and loved ones.

Together we will create the right synergy to MAXIMise your life-goals...

我热烈欢迎各位光临参加马胜资本第一届2013澳门国际金融交流会。这项盛会是我们的先行者会员要向全世界推介马胜平台和企业模式，而经过10个月坚定不移的决心、信念及不懈的努力所达成的成果。

2013国际金融交流会为我们提供一个最佳的机会，以认识来自他国的伙伴、互相切磋、分享市场知识和向有共同意志的商界人士学习。我们也邀请了世界知名的作家、平台讲师及金融专家在交流会上演讲，让我们对我们进行交易的瞬息万变的金融世界有更深入的认识。我相信这将有助于我们做出更好的决策、建立优秀的团队和支援我们的商业同行，为他们打造更辉煌的成就。

下来的几天将是实现各位为自己、家人及亲人所定下的愿望和一个起点和跳板。

让我们齐心合力，制定正确的协作战略，通过马胜最大程度地实现各位的人生目标！

Dr. Marc Faber 麦嘉华博士

Dear Investors,

I welcome you to Macau and to Maxim Capital's Inaugural IME.

One of the objectives of economic policy makers is to stabilize economic activity and financial markets with fiscal and monetary policies.

However, it would seem that the continuous interventions by governments with these policy tools has not resulted in less but more volatility in equity, bond, and commodity prices, as well as in exchange rates. As an example, since the January 2008 high the Indian stock market is "only" down by less than 10% in Rupee terms, but in dollar terms, it is down 41% because of the rapid depreciation of the currency.

In my opinion, far too much attention is paid by the majority of investors to stock markets and far too little attention is paid to longer term currency trends.

亲爱的投资者,

我衷心欢迎各位光临澳门和参加马胜资本的首届国际金融交流会。

经济政策的决策者的目标之一就是落实财务和货币政策以稳定经济活动和金融市场。不过，各国政府不断干预这些政策工具，似乎并没有减少、反而增加了资金、债券及商品价格，以及汇率的波动性。举个例子，印度股市经过了2008年1月的高峰后，以卢比计算的话，‘只是’下跌了不到百分之十，但是由于美元的迅速贬值，以美元计算的跌幅却高达百分之四十一。

依我所见，大部分投资者过于注重股市，而没有注意到更长远的货币走势。

Daniel Ang 洪老师

In light of the upheavals in financial markets brought about by the global financial crisis of 2008/9 and the impacts they continue to have on various forms of investments, the needs of the investing public have never been more acutely felt than by the man-in-the-street.

This is because the truly wealthy have their private bankers and investment experts taking care of their portfolios but the bulk of mankind are left to fend for themselves. Most are not even aware this tectonic dislocation in the world financial system is anything but normal.

It is not every day we see financial institutions catering to the needs of the little guys. While the well-heeled have their private bankers and hedge fund managers to cater to their investment needs, the retail investors often are left to fend for themselves – often with disastrous results.

To this end, Maxim Capital, through its unique and innovative product offerings have given the investing public a way to profit from the gyrations and volatility in the world's largest financial market – the foreign exchange market.

By engaging industry veterans such as myself, Maxim capital has provided me with a platform to share and impart my combined knowledge on practical trading to the laymen.

To the management and the growing believers of Maxim, many happy returns!

2008/9年全球金融危机对金融市场造成的动荡，以及持续对各种形式投资带来的冲击，使到一般人对投资大众的需求的 感受，比过去任何时候更为迫切。

这是因为真正富有的人拥有私人银行家和投资专才代劳处理他们的投资组合，而大部分人则必须自己照顾自己。大部分人甚至不晓得世界金融制度这个结构性的悬殊根本是不正常的。

正当知情者获得巨大的利润和继续从美联储、欧洲委员会、英格兰银行及日本每天在金融市场上出现的巨大交易机会，银行等组织所奉行的极度松弛的货币政策受惠之际，大部分的投资大众仍然对金融市场每天出现的许多交易机会一无所知。

我们不能常看到金融机构照顾升斗小民的需要，但富人却有私人银行家和对冲基金经理去满足他们的投资需要，而散户投资者则必须自生自灭，而且往往遭遇灾难性的后果。

在这方面，马胜资本通过独家的创新产品，为投资大众提供了在世界最大的金融市场—外汇市场的瞬息万变、起伏不定的局面下获利的途径。

虽然所有投资产品都有风险，但马胜资本提供投资产品的精神，是值得赞许的。马胜不满足于仅仅提供投资产品，而且同样热衷于为个别投资者灌输必要的知识和工具，以D. I. Y的自行方式投资—如果他们要这么做的话。马胜通过罗致好像我这样的行业宿将，为我提供平台，让我和外行人分享及传授我对实际交易的知识。

我预祝马胜管理层和越来越多的相信者财源广进！

《融资租赁在美国》简介

我国的融资租赁行业已经有30年的历史了。1981年4月，中国东方租赁公司在北京开业，标志着我国的现代租赁——融资租赁业的开端。截至2012年底，我国在册运营的各类融资租赁公司（不含单一项目融资租赁公司）已达到560家。融资租赁起源于美国，美国的融资租赁市场已发展为成熟的市场，世界各国、各地区的融资租赁都直接或间接地从美国借鉴。在这种背景情况下，本人编写《融资租赁在美国：识别与借鉴》供我国融资租赁业界参考。编写本书的目的，首先是识别，识别美国租赁业的历史和现状，识别美国的法律体系和司法体系，识别美国租赁业的发展简史，识别美国租赁业的关键操作。其次是借鉴，在实际工作经验的基础上，分析美国租赁业的哪些经验适合我国，哪些需要调整后适合我国，哪些不适合我国，以避免盲目性。

MAXIM TRADER - GLOBAL TRADING SOLUTIONS 马胜金融-全球交易方案

Welcome to FX Trading

The Foreign Exchange Market (Forex, FX) is the arena in which a nation's currency is exchanged for that of another at a mutually agreed rate. It was created in the 1970's and is now considered to be one of the largest financial markets in the world because of its huge turnover. Based on the announcement of the Bank of International Settlements (in their Triennial Central Bank Survey of 2007), the average daily turnover in global foreign exchange markets is estimated to be over USD4.5 trillion.

Through the power of the Internet, e-trading in the Foreign Exchange Market is now made available to a wider range of investors and traders. In an industry where participation used to be limited to banks and other major institutions, the Internet has furthered the reach of FX traders all the way to retail investors. Retail Forex, also known as "off-exchange market" segment, is estimated to be worth 2% of the total FX market with daily trading volumes of USD50-60 billion.

欢迎加入外汇交易

外汇市场是以彼此议定的汇率交换国家货币的场所。外汇市场于20世纪70年代，目前由于营业额浩大而被认为是世界上最大的金融市场。根据国际结算银行（2007年3年度央行调查）的宣布，全球外汇市场平均每天的营业额估计超过4.5兆美元。

现在由于互联网的力量，更多投资者能够参与外汇市场的交易。在这个过去只是银行和其他主要机构才能参与的行业，由于互联网的存在，而把外汇操盘手的种类扩展至散户操盘手。据估计，散户外汇交易或称为“场外”部分的每天交投量达500-600亿美元，占总外汇市场的百分之二。

Who we are

Maxim Trader is managed by Maxim Capital Limited, part of Royale Group Holding Inc., a public listed Financial and Investment Trust Company in the United States and a financial trading facilitator and market research house with operations throughout Europe and more recently in the emerging financial powerhouses of Asia like China, Hong Kong, South Korea & South East Asia.

Founded by a group of experienced and enthusiastic traders, financial analysts and actuaries, Maxim Trader aims to provide the best trading solutions for the trading and liquidity markets industry.

Maxim Trader runs its own fund management and proprietary account to provide clients with a trading platform that enables professional traders to grow their business with ease of mind, knowing that they are getting the most competitive rates coupled with state-of-the-art trading technology. Additionally, beginner traders will benefit from the experience of and guidance from our trading specialists and experts.

OUR VISION

Maxim Trader aims to provide world class financial solutions to our customers by providing them access to financial instruments at its best trading condition, a safe environment for their trading activities and to build a globally trusted brand in the online trading industry.

OUR MISSION

Maxim Trader will maximize pooled resources, apply sound fund management techniques and proven expertise to generate wealth and create value for all clients, partners and stakeholders.

公司简介

马胜金融是由马胜资本有限公司管理。马胜资本是美国公共挂牌金融和投资信托公司—皇家控股集团（Royale Group Holdings Inc.）的子公司。马胜资本是一家金融贸易促成商兼市场调查机构，业务遍及欧洲，并于最近进军亚洲新兴金融强国如中国、香港、韩国及东南亚地区。

马胜金融有一群经验丰富、热衷的交易商、金融分析员及精算师创立，目的在于为交易和流动资金市场业提供最好的交易方案。

马胜金融经营本身的基金管理及专营权账户，为客户提供交易平台，让专业交易商获得最有竞争力的利率和顶尖交易技术，从而放心地发展他们的业务。除此以外，交易新手也可以从我们的交易专家和经验及指导下受惠。

我们的愿景

马胜将为投资者在其最佳的交易条件下，提供世界级投资方案。运用其金融工具为投资者在交易活动中，创立一个最佳的资金交易平台，在网上金融市场领域中创建全球性值得信赖的品牌。

我们的使命

马胜金融将把汇集的资源最大化，应用完善的基金管理技巧和经过验证的专业知识为全体客户、合作伙伴、利益相关者共同创造财富和价值。

OUR STRATEGY

Maxim Trader opened its first Asia Pacific office in New Zealand, and quickly expanded to Japan, China, Taiwan, Hong Kong, South Korea and soon will be focusing its efforts towards Europe and the Africas.

Maxim Trader's strategy for growth focuses on the emerging markets of South East Asia, which has experienced rapid expansion and increased demand for financial services in recent years. Maxim has considerable interest in the market in China, where forex futures trading saw a boom in the late 1990's which attracted a large number of domestic enterprises and individuals. Due to the lack of understanding of the forex market, the majority of traders in China have experienced big losses in the past. Maxim Trader aims to reverse this trend by gathering top investment professionals with vast trading experience to form the Maxim Trader Fund Management program.

China's foreign exchange reserves currently reach up to 2.13 trillion dollars. The reserves, already the world's largest, grew by 185.6 billion dollars in the first six months of 2009. In view of its tremendous potential, Maxim Trader will continue to place priority on expansion in the China market by offering regional promotions and localized products and services while adapting to local trends and practices.

我们的策略

马胜金融在新西兰设立亚太区的首间办事处后，迅速把业务扩展到日本、中国、台湾、香港、韩国等地，并且不久将全力向欧洲及非洲扩展。

马胜金融的成长策略以近年来经济迅速扩张，金融服务需求增加的东南亚新兴市场为重点。马胜对上世纪90年代外汇期货交易兴起、使大批国内企业和个人趋之若鹜的中国市场，拥有重大的利益。过去，中国的多数外汇操盘手对外汇市场一知半解，以致蒙受巨大亏损。马胜金融的目的是要罗致拥有丰富交易经验的一流投资专才，除了马胜金融基金管理计划，以扭转这种趋势。

中国目前的外汇储备高达2.13兆美元，居世界之冠。在2009年的头6个月，中国的外汇储备更加1856亿美元。

基于中国外汇市场的巨大潜能，马胜金融将继续优先开展中国市场的业务，进行区域性促销和提供本土化产品及服务，同时适应当地的趋势和作业方式。

SECURING YOUR INVESTMENT

At Maxim Trader, no other concern is of higher priority than the safety of our clients' funds.

All of our clients' funds are individually and fully secured in the form of a parental guarantee provided by our parent company, Royale Group Holding Inc. In simple terms, every dollar invested by you is backed by a corresponding share in our parent company. With this unique arrangement, investors can take comfort in the knowledge that in the unlikely event Maxim Trader becomes insolvent, they have in their hands the shares of a public listed NASDAQ OTC markets company that can be used to mitigate against their losses.

保障您的投资

对马胜金融而言，我们最关注的莫过于客户自己的安全。

客户的所有资金个别和完全由我们母公司—皇家控股集团提供的总担保所保障。简言之，客户所投资每一块钱都以我们母公司的相应股份担保。有了这种独一无二的安排，投资者将感到安心，因为他们知道万一马胜破产，投资者手上还持有一家公共上市的纳斯达克场外交易市场公司的股份可以用来减轻他们的损失。

CHARTING NEW HEIGHTS

Maxim Trader foresees a great potential and increasing demand in China for total Forex and financial solutions. We are optimistic of achieving 200% growth annually for the next 3 years and a gradual expansion rate thereafter involving the opening of at least 12 branches and academies in major cities across China as we continue to set new benchmarks in establishing core competency professional skills in Forex trading and Liquidity Management services.

Consistent breakthroughs continue to spur the growth of the company. In year 2013, we launched the innovative MT4 ECN trading along with our Fund Management program with the lowest deposit requirements in the market at just USD1,000. We will also subsequently expand our range of services beyond forex trading into the development of futures trading & binary options trading which will be operational by the end of the first quarter of 2014.

With a vision to be a pioneering company in forex trading that engages skilled individuals from around the world, and helmed by a management team comprising top talents in the industry, Maxim Trader continues to evolve and generate new value-added services for the benefit of its clients.

创造新的事业辉煌

马胜金融预见中国对全方位外汇交易及金融方案具有很大的潜力和日益提高的需求。我们有信心在中国各地主要城市设立至少12间分行和逐步扩充后，将在今后3年内创下每年百分之二百的增速，同时继续在外汇交易及流动资金管理，制定核心主业技巧的新基准。

马胜在业务上的不断突破，持续带动公司的成长。2013年，我们推出了创新的MT4 ECN交易平台和基金管理计划，提供市场上仅仅1000美元的最低按金要求。随后我们将把服务范围扩大到外汇交易以外，而研发期货交易及二元期权交易。这些服务将在2014年第一季度底启动。

马胜金融的愿景是成为外汇交易的先行者公司，雇佣来自全球的熟练人才和由包含外汇交易行业顶尖人才的管理团队掌舵。为了实践这个愿景，公司不断为客户研发新的增值服务。

RIDE THE WAVE

Daniel Ang examines the emerging risks and opportunities in the post QE era.

如何应对量化宽松减缩的巨浪

洪老师分析后量化宽松时代所涌现的风险

Ever seen an ocean liner or an aircraft carrier making a U-turn? Probably not. Before a huge ocean-going vessel such as the Queen Elizabeth can do that, it must first slow down. Even with all engines powered down, the vessel will continue to surge forward on its own momentum for an extended distance.

Something akin to this analogy event took place on May 22. On that fateful day, the U.S. Federal Reserve Chairman Ben Bernanke announced a timeline for the end to the third instalment of its massive quantitative easing (QE) programme. In it, he announced the US Fed's intention to 'taper' its monthly \$85 billion bond-buying program with a complete end to this program by mid 2014.

QE1, QE2 & QE3

At the height of the 2008/9 financial crisis, slow growth and high unemployment and the near meltdown of financial markets forced the U.S. Federal Reserve (the Fed) to stimulate the economy through the unconventional method of quantitative easing. The first of the QE program lasted from November 25, 2008 through June 2010. That program dubbed QE1 had little impact, so the Fed announced an expansion of the program from \$600 billion to \$1.25 trillion on March 18, 2009.

Immediately after QE1 wrapped up, trouble emerged in the form of slower growth and the widening spread of the crisis to eventually embroil the Euro zone; resulting in a domino-effect of debt crisis and renewed instability in the financial markets. The Fed responded with a second round of quantitative easing later dubbed as QE2 which involved the purchase of \$600 billion worth of short-term bonds. This program ran from November 2010 through June 2011 which sparked a rally in equity markets worldwide but did little to spur sustainable economic growth within the U.S.

On September 13, 2012, the U.S. Federal Reserve launched its third round of quantitative easing. In addition, the Fed officially stated – for the first time – that it would keep short-term rates low through 2015.

These moves reflect the Fed's view that the U.S. economy still hasn't reached the point of self-sustaining growth (in other words, the ability to keep growing without stimulus). Accordingly, the Fed has adopted what has been called "QE Infinity," a plan to purchase \$85 billion of fixed-income securities per month, \$40 billion of mortgage-backed securities and \$45 billion of U.S. Treasuries. Unlike QE1 and QE2, this program has no set end date.

Unwinding of quantitative easing

In an effort to calm financial markets following the announcement by Ben Bernanke on May 22, members of the Fed including Bernanke himself have been going out of their way to stress that the end of the QE program does not necessarily mean the pending rise in interest rates. "Tapering" is a term now associated to the Fed's slowing down of its bond-buying program.

While stating that the quantitative easing policy remains in place for now, the Fed Chairman also stated the policy remains dependant on incoming data. Given the improvement in the U.S. economy, he expects this data-driven approach will prompt him to begin to taper QE before the end of 2013, with the program ending entirely in 2014.

Nevertheless, Bernanke's May 22 statement represented the clearest signal yet from the Fed that it may begin to pull back on its stimulus policy, and that it may even do it in September 2013 (sooner than investors had been expecting). At least initially, the markets have responded unfavourably to this realization.

各位是否见过游轮或飞机掉头转弯呢？各位或许没见过。一艘庞然大物的游轮，例如《伊丽莎白女皇号》要掉头转弯之前，必须先放慢速度。即使关掉所有的引擎，船还会继续靠自身的原动力向前冲一段距离。

5月22日就发生了一件好像游轮掉头转弯的事。在这一天，美国联储局主席伯克南宣布结束第三波大规模的量化宽松（QE）计划的时间表。他宣布联储局有意‘收紧’（taper）联储局每月斥资850亿美元购买债券的计划，并在2014年中旬之前完全终止此计划。

第一、第二、第三波量化宽松

在2008/09年爆发的金融危机达到高潮时，美国经济停滞、失业率高涨，金融市场近乎崩溃，迫使联储局不得不采取量化宽松（quantitative easing，简称QE）的另类方法来刺激经济。第一波QE计划从2008年11月25日实施到2010年6月。这项称为QE1的计划没有带来什么成效。于是联储局在2009年3月18日宣布把计划的资金从6千亿美元增加到1.25兆美元。

QE1结束后，问题即刻浮现：经济成长变得更加缓慢，金融危机逐渐扩大，最终把欧元区也卷入，造成了债务危机的骨牌效应和金融市场再次出现不稳定的局面。联储局采取的对策是推出第二波的量化宽松，或QE2计划，购买价值6千亿美元的短期债券。这项从2010年11月实施到2011年6月的计划使到全球资金市场回弹，但却无法刺激美国经济持续成长。

2012年9月13日，联储局出台第三波的量化宽松计划。除此以外，联储局也首次正式表示将使短期利率维持在低水平，直至2015年全年。

以上的举措反映出联储局的看法，也就是美国经济仍然没有达到自我持续的程度（换句话说，在没有刺激下继续成长的能力）。于是，联储局采取了所谓的“无限量化宽松”（QE Infinity）的计划，每月购买850亿美元的固定收入证券、400亿美元有抵押支持的证券，以及450亿美元的美国国库债券。和第一、第二波量化宽松不同的是，无限量化宽松计划没有制定结束的日期。

量化宽松的减缩

为了安抚伯克南5月22日作出宣布后的金融市场，联储局成员包括伯克南本身四处走动，强调QE计划的结束未必意味着利率即将提高。目前“逐渐减缩”（Tapering）一词是用来形容联储局放慢购买债券计划的行动。

虽然这位联储局主席表示量化宽松计划目前继续进行，他也表示联储局的量化宽松政策依然取决于未来有关美国经济的数据。要是美国经济好转，他预料这项由经济数据带动的政策将会促使他在2013年底之前减缩量化宽松计划，并在2014年全面结束量化宽松计划。

无论如何，伯克南5月22日发表的谈话，代表着联储局可能着手收回经济刺激政策的一个最明确的迹象，而且联储局甚至可能在2013年9月就会动手（比投资者所预料的还早）。最低限度，市场对这种局面的出现做出了不利的反应。

量化宽松的收紧如何影响亚洲？

亚洲市场自5月22日以来出现极度的波动，充分展示美国联储局可能撤销量化宽松计划后A将会对亚洲造成重大影响。让我们分析其中的原因以及联储局缩减对债券的购买后会对哪些资产种类造成冲击。

亚洲市场的脆弱性源于各国政府和央行在遭遇了2008/09年的全球金融危机的

How will tapering impact Asia?

As the extreme volatility in Asian markets since May 22 has amply demonstrated, a potential withdrawal of the Fed's QE program would have significant ramifications for Asia. Let's examine why and which asset classes would be impacted if the Fed tapered its bond purchases.

Asia's vulnerability lies in the expansionary policies that governments and central banks have pursued after the shock from the global financial crisis in 2008/9. In their attempts to support economic growth, most regional central banks have been slow to raise interest rates, while government finances have worsened as they stepped up spending and allowed their external balances to weaken.

The Fed's exit from QE against the backdrop of expansionary policies and strong capital inflows, diminished external surpluses or even moderate deficits, higher leverage and stretched asset prices would not be trivial for Asia.

Just look at the high asset prices in many of the region's bond, property and equity markets and we can get a sense of the adverse impact the Fed's exit from QE will have on Asian economies. Yields on government bonds priced in both local currencies and the U.S. Dollar have dropped sharply while the QE was in force, with the yield on local currency bonds dropping by between 70 basis points (in Malaysia) to as much as 580 basis points (in Indonesia). These yields could snap back up as QE unwinds, subjecting these economies to the headwinds from rising rates.

The real estate sector including REITs in particular might come under stress, as the rise in real estate prices has been both sharp and greater than the rise in incomes in most of these countries.

As for Asian equities, the impact will depend on the strength of the U.S. economy at the time of the Fed's exit from QE. However, given that growth in Asia excluding Japan is mediocre at this point, a rise in global interest rates is bound to weigh on valuations.

As such, the tapering of quantitative easing (QE) in the U.S. will likely have a destabilizing impact in Asia, a region that has been a target of hot money inflows in recent years. Strong capital inflows to emerging Asia, coupled with a prolonged period of low real policy rates have led to a worsening of emerging Asia's economic fundamentals.

With interest rates remaining low, domestic private debt – including loans by financial institutions to households and companies and corporate bonds - in the region has surged, particularly in countries such as Hong Kong and Singapore which now face risks of property bubbles.

Furthermore, there has been an increase in foreign currency denominated external borrowing which increases the risk of a currency mismatch if Asian currencies depreciate sharply. Potential large foreign equity and/or bond-related outflows are a significant risk for Asia currencies.

Besides India and Indonesia, Hong Kong and Singapore are most vulnerable to a winding down of QE.

With its currency pegged to the US Dollar, Hong Kong has imported the U.S.'s loose monetary policy which has in turn stoked an unprecedented boom in its housing market. Property prices have risen by 128 percent since December 2008 and a tapering of QE could trigger a major correction in the market as interest rates rise and liquidity tightens.

Singapore, a country in which a sizable portion of household assets are concentrated in property, would be subject to similar risks. Domestic interest rates could rise sharply and lead to balance sheet problems for households which increased leveraged on the assumption that property prices would remain buoyant.

震后，实施扩张性的政策。为了设法扶持经济增长，多数区域央行并不急于调高利率，而各国政府因为增加开销和任由对外贸易差额削弱，以致财务状况每况愈下。

在这种扩张性政策和强劲的资金流入、对外贸易顺差缩小或出现适度不敷、高杠杆及资产价格高涨的背景下，联储局退出量化宽松计划对亚洲带来的冲击将是重大的。

我们只要看看亚洲地区许多国家的债券、物业及资金市场居高不下的资产价格，就能感觉到联储局结束量化宽松计划将会对亚洲经济体造成的负面冲击了。

在实施量化宽松计划时，以当地货币及美元定价的政府债券的收益率大幅下滑，其中本地货币债券的收益率的跌幅介于70个基点（马来西亚）至580个基点（印尼）之间。如果量化宽松计划叫停，这些收益率将飙升，使到这些经济体面对日益高涨利率的逆风。

房地产领域，尤其是房地产投资信托（REITs）将面对压力，因为房地产价格的涨势比以上大部分国家的收入的涨势更为迅猛。

至于亚洲股市方面，联储局结束量化宽松计划所带来的影响将取决于美国经济在联储局结束量化宽松计划时的实力。然而，鉴于目前亚洲除日本以外的经济成长乏善可陈，全球利率上调，势必对股市的估值造成压力。

因此，美国逐渐收紧量化宽松将可能对近年来成为热钱涌入目标的亚洲，带来不稳定的冲击。强劲的资金涌入新兴亚洲，加上长时期的实际政策低利率导致新兴亚洲的基本条件日渐削弱。

亚洲地区的低利率使到国内私有债券—包括金融机构提供给家庭和公司的贷款及企业债券剧增，尤其是在类似香港和新加坡等国家及地区，以致目前面对房地产泡沫的风险。

除此以外，以外币计算的外债有所增加，万一亚洲货币大幅度贬值，将会提高亚洲各国遭遇货币错配的风险。亚洲货币面对的一个重大风险是外资和/或债权有关的资金大批量外流。

除了印度和印尼以外，香港和新加坡是最容易受到量化宽松减缩冲击的国家和地区。

由于香港的货币和美元挂钩，香港输入了美国松弛的货币政策，进而掀起了房地产市场前所未有的景气。香港的房地产价格自2008年12月以来，暴涨百分之一百二十八；如果量化宽松计划减缩，将导致利率调高，银根减缩，以致可能引起市场出现大幅度的调整。

至于新加坡这个把大部分家庭资产集中在房地产上的国家，也会面对同样的风险。国内利率可能剧升，而对造成那些假设房地产价格会保持强劲而增加杠杆的家庭的收支失衡。

面对最大风险的货币是那些出现经常账户不敷或只有小额经常账户顺差的货币，如印度的卢布和印尼的卢比。跟香港和新加坡不同的是，印尼和印度也因为另一个原因而容易受到冲击。这两个国家都出现巨大的经常账户逆差，而且非常依赖外资投资组合流入以融资逆差。

印尼方面，投资组合流入的逆转将对支付平衡造成莫大压力，并导致卢比大幅度贬值。由于外流资金的数额可能非常庞大，可能迫使印尼央行大幅度上调利率，进而削减消费者和投资开销。

Currencies most at risk are those that are running current account deficits or small current account surpluses such as the Indian Rupee and Indonesian Rupiah. Unlike Hong Kong and Singapore, Indonesia and India are vulnerable for another reason. They both face large current account deficits and have become very reliant on portfolio flows to finance them.

In Indonesia, a reversal of portfolio flows could exert heavy pressure on the balance of payments, causing the Indonesian Rupiah to depreciate substantially. Given the potential size of the outflows, this could force the Bank of Indonesia to implement significant policy rate hikes, which would in turn dampen consumer and investment spending.

Similarly, in India, a reversal of capital inflows would wreak havoc on the Rupee and the country's equity market. Net capital inflows into Asia's third largest economy totalled \$88 billion in 2012, spurred by global quantitative easing. Asset price volatility and a slowdown in capital inflows would hurt investment, as uncertainty further delayed a revival of the capital expenditure cycle.

Malaysia falls into this category as well. The Malaysian Ringgit is also vulnerable because of the country's small current account surplus.

The least vulnerable is the Chinese Yuan, followed by the Taiwanese Dollar, Korean won, Thai Baht and the Philippines Peso. But the Korean Won and the Taiwanese Dollar are vulnerable to a depreciation of the Japanese Yen.

So what should investors do?

Currencies have been held hostage by QE over the last few years. For a start, a tapering of the Fed QE program should cause the U.S. Dollar to rise against all the major currencies by the year-end. Conversely, gold is likely to suffer from a stronger US Dollar as higher real rates and a significant reduction in hedge fund net long positions make gold a less attractive investment.

For currency traders, there are two elements in which they must consider when it comes to positioning for the end of the U.S. QE program:

(1) The Fed's massive stimulative programs since 2008 have resulted in an inordinate increase in supply of US Dollars in the market.

(2) The phased-in withdrawal and the eventual winding down of the QE program would mean that the tidal waves of U.S. Dollars will be rolled back by mid-2014.

When supply is cut off, simple logic dictates that price will rise over time and this was exactly what the U.S. Dollar did. In the days following May 22, the world was given a sneak preview of how financial markets will react to the possible end to the QE. Global equities, bonds and gold fell and US Dollar surged. In short, richly priced assets will fall while demand for the US Dollar will rise.

While traditional asset classes will fare very differently in an environment of rising interest rates, the currency markets has neither a bull nor a bear market per se. As an asset class that truly reflects the fundamentals of a changed and globalized world, the foreign exchange market is increasingly recognized as the place to be in a highly competitive world of alpha seeking investors/traders. This tectonic shift in monetary policy by the world's largest economic economy will have lasting ramifications and investors must recognize this mega trend for what it is. Rich trading opportunities like this simply do not happen very often. Seize the day or live to regret this once-in-a-lifetime trading opportunity.

同样的，在印度，资金流入的逆转将重创卢布和该国的资金市场。在全球量化宽松的刺激下，2012年，进入这个亚洲第三大经济体的资金流入共达880亿美元。资产价格的波动和资金流入的放慢将进一步延误资本开销循环的复苏，因此打击投资。

马来西亚也属于这一类的国家。由于国家的经常账户顺差小，马币令吉也容易受到冲击。

最不容易受到冲击的是中国人民币，其次是台币和韩圆、泰铢及菲律宾比索。不过韩圆和台币将容易受到日圆贬值的影响

投资者应如何应对？

过去几年，各国货币被量化宽松计划所挟持。美联储量化宽松的减缩初期将在年底使美元对所有主要货币的汇率上升。

相反地，美元升值将打击金价，因为更高的实际利率和对冲基金减少买空，使到黄金投资的吸引力逊退。

对货币交易商而言，在对美国量化宽松计划的结束持有仓位之前，他们必须考量以下的两个因素：

(1) 联储局自2008年所推行的大规模经济刺激计划导致市场的美元供应过度增加。

(2) 量化宽松计划的逐步撤销和最终结束将意味着美元带来的海啸将在2014年中旬减退。

简单的逻辑告诉我们，当供应切断后，价格将久而久之上升，正如美元所出现的情况一样。5月22日之后，世界预先看到了金融市场如何对量化宽松计划可能结束后作出的反应的一点头绪。全球股票、债券及黄金价格将受挫而美元将飙升。简言之，高价资产将下跌，而对美元的需求将增加。

虽然传统资产类别将在利率高涨的环境中完全不同的表现，货币市场本身将不会出现牛市或熊市。外汇市场作为一种真正反映已经改变和全球化的世界基本经济条件的资产类别，日益被公认为寻求超过市场平均回报的投资者/交易商的一个高度竞争性的天地。世界最大经济体这种货币政策巨变将带来持久的影响，因此投资者必须认清这个大局势的真相。类似的有利交易机会可遇不可求。因此，投资者应该把握这个毕生难得的机遇，否则遗憾终生。

China

After graduating from the China University of Mining and Technology in 2005, I arrived in Shanghai brimming with optimism and hope. In September the same year, following the recommendation of a classmate, I gained employment at CNI Bullion Limited (CNI) in Shanghai and began my foray in the financial world. CNI is a member of the Chinese Gold & Silver Exchange Society (CGSE) (Membership Number 10) of Hong Kong. It mainly deals in the buying and selling of London gold and silver. During my two years at the company, I made my first fortune and accumulated valuable experience and knowledge which I could not possibly obtain from my teachers in university. Until now, such experience and knowledge remains deeply imprinted in my mind and will benefit me for the rest of my life.

In 2007, together with a friend of mine, I formed a stock information company on a joint venture basis. Unfortunately, we soon faced the onslaught of the global financial crisis which resulted in the biggest share market disaster in the Chinese stock market, sending the entire industry into a plunge from boom to doom. After struggling to keep the company afloat for six months, my partner finally decided to call it quits, and my maiden business venture ended in dismay. Since 2008, the precious metals market of China has come under adjustment and rectification by the government and I have been involved in the team management of the precious metals company in which I worked, while waiting for the dust to settle down.

I came to know about Maxim Trader for the first time in 2013. As I had no previous knowledge about capital guaranteed funds, I was rather non-receptive towards such a mode of investment for a long time. It was not until I visited the Maxim Financial Exhibition held in Guangzhou and Shanghai respectively that I eventually understood and accepted Maxim's way and culture of doing business.

After the Maxim exhibition in Shanghai in June, I decided to join the Maxim team. In the following month, I led my team to develop the Maxim business in full force. Now, after a brief one and a half months, our team has successfully recruited many clients and our total performance has amounted to one million yuan. In addition, we have made some real friends and expanded our network of contacts, besides achieving a handsome group profit.

We are now working in various cities to bring Maxim Trader to our friends and striving to build our Maxim business together in order to strengthen and expand our foothold in China. Keep it up, Maxim!

05年毕业于中国矿大的我怀着对未来的憧憬来到了上海,在同学的介绍下同年9月在上海就职于北方金银业开始了我在金融行业的征程. 北方金银业是香港金银业贸易场10号会员,主要从事伦敦金银的买卖. 在这家公司供职的2年中我赚到了我人生的第一桶金,积累了宝贵的经验和学到了学校老师无法涉及到的东西。迄今让我铭记于心,受益一生。

2007年和朋友合资成立了一家证券资讯公司。不过时运不济正好赶上全球金融危机爆发,中国股市开始了有史以来最大的股灾,整个行业从繁荣到萧条快速下滑,苦苦支撑了6个月,合伙人终于决定退出,很无奈的结束了创业之初的处女作。

2008年到至今,中国的贵金属市场一直处于政府的调整和修正当中,我也一直在的贵金属公司从事团队管理,等待尘埃落定。

2013年第一次接触马胜金融,因为以前没有涉及到保本基金方面的知识,之初一直对这种模式很长时间内都比较排斥。直到经历了马胜广州金融展、上海金融展,终于理解和接受了马胜的赚钱模式和文化,在6月上海金融展之后终于决定加入马胜的团队。之后的一个月我带着我的团队全身心的投入了马胜金融业务的开展,到今天1个半月的时间,我的团队收获了不少位客户,总业绩达到百万,结交了一批高质量的朋友和拓展了自己的事业人脉圈子,也收获了一笔不菲的团队奖励。

目前我正在各个城市之间行走努力的把马胜介绍给我最好的朋友,和我一起共同拓展马胜的业务,把这个市场在中国做强做大。

马胜加油!!!

We have been involved in the direct marketing industry in Japan for a long time, and consider ourselves "old timers" in the field. However, what attracted us to Maxim Trader was the fact that this investment platform allows us to effectively explore a brand new field, with the expert guidance of its founders. Maxim Trader also opens up opportunities to enter into new levels of cooperation with a network of partners.

我们夫妇在日本已经经营了多年的直销，在这个行业拥有丰富的经验，在遇到马胜前我们已经是非常成功的企业家，有些人甚至说我们是日本直销界的奇才，但是认识马胜的投资方案后让我们见识到了新的领域，同时也让我们迈入了另一个更高的阶层。

Maxim Trader sets the trend!

I am honored to have been introduced to Maxim Trader. Previously, I had been in sales and marketing for many years, with only ordinary results to show for it and no outstanding track record to boast about. I believe Maxim is the most challenging platform I have ever encountered in all my years in the sales and marketing line.

Nevertheless, I had no idea at all on how to go about it going in as I knew next to nothing about financial products. I finally got the hang of it after three months thanks to the support and guidance of my colleagues and partners. Gaining the trust of several businessmen whom I successfully recruited further strengthened my confidence in Maxim Trader.

Personally, I am very grateful to the leadership of Maxim management for their seriousness and integrity when it comes to forex trading. Initially, many of my business acquaintances did not have a clear picture about the workings of the company's strategy mainly because they did not understand the company. After attending the educational courses organized by the company, I felt more confident and cleared my doubts as an investor.

I strongly believe that Maxim Trader is a company I can place my trust in. The training courses organized by Maxim Trader enable more young people to succeed. I am convinced this is a triple-win situation benefiting the investor, the intermediary and the operator. Everyone is happy.

Maxim Trader equips you with the right thinking, values and philosophy in life and guides you towards the right direction in your investment.

Join us and build a life of wealth and freedom!

马胜金融. 趋势所在.

非常荣幸认识马胜金融，之前在销售市场浮沉多年，平淡无奇，根本豪无辉煌史可言。我深信这是我这么多年来在销售市场中接触过最具有挑战性的平台。

毕竟未曾接触过金融产品，不知从何开始，在同事伙伴的支持引导下，费时三个月，终于掌握了其中的窍门，并成功吸引一些商家们的信任也建立了我在马胜的事业。

我个人非常欣赏管理层的领导方式，在外汇交易上投资的认真和真诚。初期时很多友好商家都不太明白公司的策略操作，都只因不了解。但在我多次参与公司举办的教育辅导课程后，让我充满信心，投资者一切的疑惑也迎刃而解。

我坚信马胜金融是一家值得信赖的公司，马胜金融一切的教育训练课程，能成就更多的年轻一代，我看懂这是一个三赢的局面，不论是投资者，中介商和经营者，都各有所获，皆大欢喜。马胜金融教育您有正确的思维，正确的价值观，正确的人生理念，指引您明确的投资方向。

加入我们的行列，建立财富自由的生活。

Maxim Trader is a unique platform. We carry with it the hope of many people. Without a sound fund management strategy, we wouldn't be able to start and there could be no future as well. We are growing and what we are today is also because of the trust from our investors, which is our greatest asset. Making them successful by fulfilling our promise will ensure the greatest success for Maxim.

As the financial world was overwhelming with greed and fraud especially during the past decade, there is little trust left among investors when it comes to entrusting one's money to others for investment returns.

Many were of the opinion that even the established financial institutions took advantage of their clients. Integrity was no longer the guiding value and what took precedence was greed. Instead of taking the honorable path of "Love People, Use Money", they evolved into the devil's advocate, practicing "Love Money, Use People".

It is a big challenge when Maxim decided to take the path less traveled. To walk the talk, we have to continuously display uncompromising professionalism and strength in our fund management, delivering results that enhance our client's confidence and honoring our promise to them even during adverse situations!

When other big institutions have became old stories, we must strive on with determination to create a new history!

马胜是一个独一无二的平台。我们承载着许多人的希望。没有完善的基金管理策略，我们将不能启动，也遑论什么前途。我们的业务日益壮大，我们有今天的地位也是因为投资者对我们的信任，他们是我们最宝贵的资产。实现我们的承诺，帮助投资者成功将确保马胜取得最大的成就。

金融世界充斥贪婪和欺诈，尤其在过去10年，以致投资者对金融市场的信心荡然无存，对于把钱交付他人投资赚取回报，感到疑虑。

许多人认为即使是知名的金融机构也要占客户的便宜。诚实不再是引导人们的价值观，取而代之是贪婪。金融机构不再遵循“爱他人、利用钱”的厚道，而演变成魔鬼的代言人，走的是“爱金钱，利用人”的路线。

当马胜决定走少人邹过的道路时，的确是个巨大的挑战。要言行一致，我们必须在基金管理方面体现不妥协的专业态度个实力，交出成绩，增加客户对我们的信心，同时即使在不利的局面下也兑现我们对他们的诺言。

当其他的大机构成为陈年旧事时，我们必须以坚决的意志努力创造新的历史！

I have 20 years of working experience in the insurance industry and even had my own insurance brokerage. In the past two decades, I have achieved wealth and a comfortable lifestyle through my insurance business. However, I am a person who likes to take on bigger challenges for the sake of self-development. Because of this, I had been looking for different sectors in which to explore my potential. It was then that I came to know about Maxim Trader by chance. Maxim forex trading has opened up an international perspective to me and enabled me to discover that I am capable of going much further. During the short span of a year after joining Maxim's forex investment team, the growth of my intellect and wealth has accelerated proportionally. I am grateful to Maxim Trader for providing both a platform to grow and a fast track towards success.

我从事保险行业已经长达20年，并且拥有保险经纪公司。在这20年里，保险让我得到财富也让我过上优渥的生活。不过，我是个喜欢挑战难度让自己成长的人，所以我一直都在找寻不同的领域，挑战自我的潜能。在机缘巧合下，我接触了马胜外汇。马胜外汇开拓了我对国际的视野，也让我发现原来我的能力可以去得更远。在加入马胜外汇投资团队短短的一年里，无论是个人心智或财富都是成正比地飞速增长。我很感恩马胜外汇提供了一个让我成长的平台，让我踏上了通往成功的快车道。

Asset formation, asset management, and asset protection - Maxim Trader can do all of the above. It allows us to invest even with a small amount of money, to learn about cutting edge financial management, and to possibly obtain dynamic results.

We can't believe such a financial strategy exists in this world, one which grasps everybody's needs and is customized for every investor.... We still remember the honestly surprised reaction we had when we first encountered Maxim Trader.

In Japan, an increasing number of investors are prudently choosing Maxim Trader as a safe investment choice which can be passed on to the next generation and as a means to enrich their lives. We can say this phenomenon is 'the start of new era' in Japan, in our effort to break free from financial isolation.

资产形成，资产管理，资产保障 - 马胜可以做上述所有。马胜允许我们以少量的资金进行投资，以学习前沿财务管理及获取有效成绩。

这是一种能够掌握所有人的需求并且为每位投资者量身定做的策略，而这种金融策略的存在让人无法相信。我们依然记得当我们第一次遇见马胜时的实际惊讶反应。

在日本，越拉越多的投资者审慎选择马胜为安全投资，因为它可以传递至下一代并且丰富他们的生活。在日本，我们努力的从金融隔离中挣脱，因此我们可称这现象为“新时代的开始”。

As an investor, I have been very prudent and will make careful study before making any investment. I only came to know about Maxim Trader last November. After seven month's in-depth understanding, research, and analysis, I eventually joined Maxim Trader in June this year. My investment in Maxim will bring me profit. I have never doubted this but what really surprised me was that the profit and returns I received was so fast and substantial. In just a month, I have acquired an Audi Q7. This has further strengthened my conviction that joining Maxim Trader was a right choice. In investment, either you don't invest at all or you invest to get the best return. This has been my working motto. If you believe in Maxim and become a part of Maxim, joining the ranks of the rich is no longer a dream. You are the next rich man. Are you ready?

作为一个投资者，我一直都是一个谨慎的人，做每一项投资前，我都会仔细考察。第一次接触到马胜是去年的十一月份，经过七个月的深入了解，研究，分析，终于在今年的六月份加入马胜，投资马胜会带给我盈利，这一点上我从没怀疑过，但是令我惊讶的是它带给我的利润回报竟会是如此迅速跟巨大，短短一个月的时间，我就赚了一辆奥迪Q7，这使我更加坚信加入马胜是一次最正确的选择。做投资，要么不做，要做就做最好，这一直都是我的工作格言，相信马胜，加入马胜，跻身富人的行列不是梦！下一个富豪就是你，你准备好了吗？

15 Tips For Success in Forex Trading

15个外汇交易的成功提示

1. Don't put all the eggs in one basket. If possible limit your risk to less than 3% of the total trading account. The successful trader can survive unfavourable market conditions while unsuccessful traders can lose his account after 10 unprofitable trades in a row. Don't move too fast in order to make huge profits.
2. Go with the flow! Learn to understand that trends can be your friend. Recognize the trends that are happening and profit from it. It's not always profitable to go against the trend in an egoistical way.
3. Try practicing on a demo account first before investing in a real Forex account. Why make mistakes with real money? If you're a beginner, you need knowledge and practice to make successful trades. Most importantly, you need time. Successful traders hone their skills on demo accounts for years before entering the market.
4. Simplify, simplify. Don't get caught up with too much information, and this applies to indicators, signals and trading strategies. Avoid confusion by following simple but workable methods for trading.

1. 切勿孤注一掷，把所有鸡蛋放在一个篮子里。能够的话，把风险限制在总交易账户少过百分之三。成功的操盘手经过连续10 次的无盈利交易后，可以在不利的市场状况中继续生存，而不成功的操盘手则可能失去他的账户。为了要争取丰厚的利润，别急于开仓。
2. 顺着潮流！学习了解市场趋势可能对你有帮助。认清时下的走势和从中获利。一意孤行，逆着市场走势行事不能往往有利可图。
3. 先尝试以示范账户练习，然后才开真正的外汇交易账户。何必用真钱犯错？如果你是新手，你需要知识和练习才能进行成功的交易。最重要的是，你需要时间。成功的操盘手进场前需要经过多年示范账户磨练交易技巧。
4. 力求简单。别让太多的资讯困扰自己，这是指各种指标、讯号及交易策略等信息。按照简单而可行的交易方法，避免发生混淆。

5. Learn about Fibonacci levels and how to use them for trading. Fibonacci can be very helpful in trading, even partially using the study, for example, to determine the best exit, give traders an advantage in trading.
 6. Always trade what you see, not what you would like to see. Always ensure that a signaling bar/candle on the chart is fully formed and closed before you enter a trade.
 7. Be careful when using a highly leveraged account. It will, of course, give a trader more financial gear to trade, but for inexperienced traders high leverage, and, in fact, any Forex leverage can be disastrous. High leverage means additional risks which you may not be prepared to handle.
 8. Have a strategy. Most beginner traders go into it without strategy and based mostly on ego. In fact, to be a successful trader, one needs discipline and experience, and acceptance of some of the simple realities of the Forex market.
 9. Powerful currencies such as the USD, GBP, Euro, Yen and Swiss franc are reliable and always in demand. Stick to these when trading, especially if you don't want to take up too much risk.
 10. Stick with tangible knowledge and trends. Make sure that you're focusing on trading trends rather than doing guess work. Even if your instincts about something have been right before, you can be wrong a lot more often than you are right.
 11. Make profit only with your profit. Keep your initial investment as your reserve fund. Remember, you're here for the profit, not to lose your money.
 12. Think long term. Successful traders don't win in every trade, or become rich in just a few trades. Think about being profitable in the long term.
 13. Add positions only when the trade is proven to be profitable. Don't add positions to a losing trade. If you are experiencing losses in a row, just cut trading and continue tomorrow. Trying to get revenge is only going to make it worse.
 14. It's OK not to trade. Not having any clear direction or information on the market? It's alright to just stand aside. Save your capital for another day instead of taking unmitigated risks.
 15. Look at the big picture. Effective trading requires monitoring daily, weekly price movements. Learn to detect market patterns in a larger time frame, and not just for the time frame you're trading in. For example, if you're trading with a 15 minute time frame, look at the 1 hour charts.
5. 了解什么是菲波纳奇水平 (Fibonacci levels) 及如何使用它进行交易。即使只局部使用菲波纳奇水平, 它可能对交易有莫大的帮助, 例如决定什么是最佳的退场方法, 使操盘手在交易中占优势。
 6. 根据你所看到的事实交易, 而不是凭你所希望看到的事实交易。进行交易前, 先确保图表上讯号棒/棒烛完全形成和消失。
 7. 使用高度杠杆账户时, 应保持慎重。当然, 这种账户让操盘手有更多的财力进行交易, 但对无经验的操盘手来说, 高杠杆—以及事实上任何外汇杠杆—都可能带来灾难性的后果。高杠杆意味你要冒着更多你所不能承担的风险。
 8. 交易前制定交易的策略。大部分交易新手主要凭自己的一股冲劲进场交易, 而没有制定交易的策略。事实上要成为成功的操盘手, 需要纪律、经验及接受外汇市场的一些简单的事实。
 9. 强势货币如美元、英镑、欧元、日圆及瑞士法郎等可靠和抢手。把交易范围锁定这些货币, 特别是如果你不想承担太大的风险。
 10. 坚持具体的知识和市场走势。确保你所注重的是交易的趋势而不是凭空猜测。即使直觉过去告诉你某些事情是对的, 你猜错的机率往往比猜对的机率高。
 11. 用利润争取利润。把最初的投资保留着储备资金。要记住, 外汇交易的目的是赚钱, 不是亏钱。
 12. 放长线。超过的操盘手不是每笔交易都赢, 或经过几笔交易后就发达。要赚钱必须想的更长远。
 13. 交易证明有利可图后才加仓。如果交易亏钱, 切勿加仓。若是连续亏损, 则须斩仓, 明天继续交易。尝试报复, 只能得不偿失。
 14. 按兵不动。市场没有明确的方向或信息吗? 干脆采取不进场的旁观态度是绝对没问题的。以其冒着无限的风险, 不如保留资金, 改天才交易。
 15. 注意大局。有成效的交易需要观察市场的每天、每周价格走势、学习以更大的期限, 而不是你进行交易的期限侦察市场的形态。例如如果你进行交易的期限是15分钟, 那么你必须看1小时的交易图表。
