What Else Can We Invest?****全球经济**

随着全球经济一体化的发展，各国的经济也紧密相连。自2007年美国次贷危机爆发以来，影响面不断扩大，继而演变成为一场波及全球的金融海啸，引起了各方的诸多反思。美国金融危机由于去“杠杆化”导致美国金融资产大幅贬值，其美元独霸地位摇摇欲坠，新兴经济体面临极大的经济困难。中美之间因资产价格变化带来两国金融资本实力的改变，促使中美外交关系更多地涉及金融领域的合作。

Global Economic Overview

With the development of global economic integration, national economy is closely linked. Since the U.S. subprime mortgage crisis in 2007, its impact expanded and evolved into a global financial tsunami. It caused many reflections of the parties. Due to deleveraging, the U.S. financial crisis caused the substantial depreciation of U.S. financial assets. The Dollar's dominance and its status is shaky. Emerging economies are facing great financial difficulties. The financial capital strength is changing between China and the United States, because of the assets price change. That impels more financial cooperation in foreign relations between the two countries.

日本

日本是美国国债的主要持有国之一，持有量仅次于中国。从盟国立场出发，日本不会考虑抛售美国国债，如果把抛售得来的美元换成日元，可能加速日元升值。从短期来看，日元升值的确会提升日元在国际货币体系中的地位，加强产业结构优化和技术升级，提高综合国力，增加对外直接投资，降低进口产品价格等方面发挥一定的积极效应。但从长期现实来看，应更加注意日元升值对日本经济形成的负面效应，比如：商品出口锐减，严重影响国际收支盈余；大量游资涌入，导致投机现象过热，加剧股市动荡等。

种种迹象表明，全球金融市场最不可能败落的就是货币市场。不管是美元霸主地位牢不可破，还是其他国家的货币取代美元独霸时代，外汇投资可双向交易的机制始终能够给投资者带来收益。

中国

中国外汇市场是中国金融市场的重要组成部分，在完善汇率形成机制、推动人民币可兑换进程、服务金融机构和监管当局、促进宏观调控方式的改变以及促进金融市场体系的完善等各方面已经发挥了不可或缺的积极作用，并将沿着良好的势头发展着。

随着中国经济的高速发展，国民可支配的收入越来越多，投资意识也越来越强，但伴随着人民币的持续升值，以及股票市场的高位震荡，房地产市场泡沫的日益严重，投资的风险愈来愈大。在动荡不安的金融市场，处处是危机，稍有不慎，便会落得一夜破产。

这时候，外汇市场以其公平透明、24小时不间断交易、杠杆效应等特点，吸引了众多的投资者加入。外汇市场在过去几年里得到了惊人的发展，据报道，贸易结算总量不到每天外汇交易总量的2%，98%以上的货币交易都是炒卖国际汇种套利的热钱。投资者购买或卖出不同的货币，是为了在相对价值波动时取得利润，由于外汇交易能让投资者快速进行交易、买卖差价低、并充分利用杠杆原理，因此深受投资者喜爱。

外汇投资无疑成为了国民最为关心的投资渠道，甚至有人说：选择了外汇投资，就等于选择了最佳的金融投资品种，同时也是选择了能够创造财富的大好时机。

Japan

Japan is one of the main holders of US treasures, only next to China. Proceeding from the Allied position, Japan won't consider selling. If selling off the dollar for Yen, it could accelerate the appreciation of Yen. In the short term, Yen appreciation could indeed play a certain positive effect, such as boost the Yen's position in the international monetary system, strengthen the industrial structure optimization and upgrade technology, improve the comprehensive national strength, increase foreign direct investment, lower the price of imported goods. But in the long run, we should pay more attention to negative effects of the Yen's appreciation to Japanese economic, such as: a sharp drop in exports, seriously affect the international balance of payments surplus; a large number of hot money inflow that lead to speculative phenomenon overheating, increase market volatility.

There are various indications that the currency market is the least likely to decline in the global financial markets. Dollar supremacy unbreakable or other country's currency to replace the dollar dominating era, the two-way trading mechanism of foreign exchange investment can always bring benefits to investors.

China

China's foreign exchange market is an important component of China's financial market. In perfecting exchange rate formation mechanism, promoting the RMB convertible processes, serving financial institutions and regulatory authorities, accelerating the change of the macro-control mode and boosting the improvement of the financial market system and other aspects, China's foreign exchange market has played an indispensable positive role and will develop along with good momentum.

With China's rapidly growing economy, the national disposable income has correspondingly increased substantially; end result is there is greater awareness and curious need for investment. With the continuous appreciation of the Chinese Yuan as well as the high oscillation of the stock market, the chance of a bursting of the real estate market bubble is becoming more and more a reality than speculation, the investment risks get higher. As a result, the turbulent financial market will soon face a crisis and people will end up being made bankrupt overnight if not careful.

At this time, foreign exchange market attracts many investors to join, for its fair and transparent, 24-hour trading and leverage. The foreign exchange market got tremendous development in the past few years. According to reports, trade settlement amount is less than 2% of the total foreign exchange transactions every day. More than 98% of the currency trading is the hot money of scalping international remit arbitrage. Investors buy or sell different currencies in order to take profit when relative value fluctuates. Foreign exchange trading enables investors to trade quickly, the difference of sale price is low, and makes full use of the lever principle, so it is popular with investors.

There is no doubt that foreign exchange investment has become the most welcomed investment channel, some even say that choosing the FX investment means selecting the best financial investment and holding the golden opportunity to create wealth.

什么是外汇保证金交易? What is Foreign Exchange Margin Trading

外汇保证金交易又称虚盘交易，是指投资者用自有资金作为担保，从银行或经纪商处提供的融资放大来进行外汇交易，也就是放大投资者的交易资金。融资的比例大小，一般由银行或者经纪商决定，融资的比例越大，投资者需要付出的资金相对就越少。

外汇保证金交易通常要求投资者拥有一定的资金实力、投资经验、专业知识和操作能力，并且具有较强的风险承受能力。

Foreign Exchange Margin Trading is also known as virtual trading, investors use their own fund as a guarantee and access financing from bank or broker, which means to enlarge your own investment fund. The proportion of the financing usually determined by bank or broker, the bigger proportion of financing is, the less fund investor is need to pay.

Foreign exchange margin trading usually requires investors to have certain financial strength, investment experience, professional knowledge and operating ability, and strong risk tolerance.

投身外汇市场的八大理由： 8 Reasons to Devote In The Foreign Exchange Market

1. 成交量大，流动性强，市场透明度高，安全不易被操纵

外汇市场是全球交易量最大、流通性最高的金融市场，平均每日交易量达4万亿美元，如此庞大的市场不存在庄家，安全不易被操纵。数据和新闻在全球范围内共享，因此索罗斯能了解到的信息，普通投资者一样可以了解到。外汇市场是世界上最公开、公平、公正的交易市场。

2. 杠杆灵活，交易成本低

外汇保证金交易是利用财务杠杆原理，将资金以扩大信用额度的方式在外汇市场上进行操作。投资少，起点低，杠杆最高可放大500倍，让投资者用小资金赚取大额利润。据统计，美国有三分一的亿万富翁都是从事外汇投资成功的。比如：索罗斯，巴菲特等人就是外汇投资中最成功的经典传奇人物。

1. Big volume, strong liquidity, high market transparency, capital is safe and not easily manipulated.

Foreign Exchange is the world's largest and most liquid financial market with an average daily turnover of FX exceeding US\$4.5 trillion. There is no possibility of market maker in such a tremendous market and safe avoid being controlled. Data and news are being shared on a global scale, investors can get the information that George Soros gets. Foreign Exchange market is the most equitable, impartial, and public trade market in the whole world.

2. Flexible leverage, low transaction cost.

Foreign exchange margin trading uses financial leverage principle, putting money in the foreign exchange market in the form of expanding credit. Little investment, low starting point, the highest leverage magnified 500 times, for investors to use little money earning large profits. According to statistics in the United States, 1 out of every 3 billionaire engaged in foreign exchange investment to become successful, and George Soros, Warren Buffett are the most legendary figures in the market.

3. 双向交易，获利不受市况所限

股票投资只有上涨才能赚钱，而外汇可以买涨，也可以买跌，无论熊市牛市，只要选对交易方向，行情波动均有机会获利。在股市中，空头行情的时间远远多于多头行情，投资机会不易把握，因此股市是个不具有长期投资价值的市场，这也是导致多数股民亏损的原因。

4. 全天24小时交易，无时间限制

每天24小时自由选择交易时间，从每周一早上6点（北京时间）开始，一直到周六早上4点结束，行情的连续性，不易出现价格跳空。除周末外，投资者可随时进行外汇交易。

5. Two-way trade, profits unrestricted with market.

Stock investment can only make money when it rises. With Foreign exchange, you can buy regardless of whether the currency is rising or going down, regardless of the bear market or bull market, as long as you select a correct direction for the deal, market volatility will help you to profit. In the stock market, bear market time is far more than the bulls. The investment opportunity is not easy to gauge. So stock market has no long-term investment value. It is also the cause of majority shareholder losses.

6. 24- Hours trade, no time limit.

24 hours a day trading hours, starting every Monday (Hong Kong time) at 0600 hours in the morning till 1600 hours on Saturday afternoon. The fact that the market is continuous means it is not easy for drastic changes in currency fluctuations. Except the weekend, investors may trade foreign exchange at any time.

5. 风险易控制，收益无上限。

任何投资的第一原则就是规避风险，保住本金。投资者可以根据行情及所能接受的损失程度，对每一笔交易设定止损价，当价格到最低止损价，交易会自动进行，防止本金受损过多。风险容易控制，而收益无上限。

6. 实行T+0制度，交易迅速，无需等待，容易兑现。

不同于股票，外汇实行T+0制度，在通常的市况下，所有订单都可以在指定的价位或者指定的范围内即时成交，可随时买卖，即时成交，获利机会较多，容易兑现。

**5.** Easy risk control, unlimited income.

The first principle of any investment is avoiding risk and keeping the capital. Investors can set stop loss price for each transaction according to the market and his accepted degree of loss. When the price is set to the lowest stop-loss price, it will automatically trade to prevent too much losses of the capital. It is easy to control risk and there are no limits on gains.

6. Implement system of T+0; trade quickly, no waiting, easy to deliver.

Unlike stocks, foreign exchange carries out a system of T+0. Under normal market conditions, all orders are available to turnover immediately at a specified price or within the specified range at any specified time. A real-time transaction can get more profit opportunities and easier to deliver.

7. 品种少而精，20种货币对易于选择。

股市中有上千种股票，期货市场同样也有众多产品，导致市场讯息繁杂，特别对于股票投资者而言，选股成为一件十分头痛的事情。而在外汇市场，货币配对供选择有限，这就使投资者可集中精力研究其中的某几个货币配对，并很快抓住它们的脉动及掌握其中的规律。

8. 外汇交易具有最活跃的黄金时间段。

外汇交易最活跃的黄金时间段是欧洲市场和美洲市场的开放时间，由于资金量和关注度的增加，汇率变动也最大，而这个时间段正是全球投资者时间最充裕、精神最旺盛的时候，可全身心投入到外汇交易中。

**7.** Fewer but better varieties, 20 kinds of currency pairs for easier choice.

There are thousands of stocks in the stock market, futures market also has many products, the market information is multifarious, stock investors in particular may find it confusing to pick the right stocks. In foreign exchange market, the choices of currency pairs are limited, which makes it easier for investors to concentrate on certain currency pairs and quickly make the right decision of buying or selling.

8. Foreign exchange trading has the most active golden period.

The most active golden period of foreign exchange is the opening time of Europe market and America market. Due to the increase in money and participation, exchange rate changes are also most volatile, at this time global investors are in full force and most active with exuberant spirits,

创造财富是一个永恒的话题，不管我们是否喜欢，财富增值是大多数人的想法，我们的生活需要金钱的支撑，而奢华的生活是我们创造财富的源动力。马胜金融集团可以为您提供专业的服务，这将是您创造财富的开始。财富是被创造出来的，而不是通过抢夺得来。看看您的周围，那些成功的商业所创造的财富价值都是旁人不可复制的模式。正是这样的契机，马胜金融集团一直用具有前瞻性的态度，来为我们的客户创造更大的价值，这是我们业务模式的一个重要组成部分，客户能够通过我们的项目开发出更多元化的交易以及创造出更丰厚的收入来源。

就是现在

在这段时间里，全球经济动荡不安，债务危机全面爆发，使得欧元区和美国等经济发达国家产生了极大的波动和经济混乱。一位18世纪的英国贵族罗斯柴尔德银行家族成员，罗斯柴尔德男爵，曾说过

“最佳的买进时机是街头到处血流成河的时候。”

所以，不再等待。

1、Sustained Profits

With the two key elements in place, leverage through resource pooling and Fund Management Team, Maxim Trader is able to achieve even greater revenue than what it has been generating stably over the decade. As our system produced profits for you, it is simultaneously producing profits off you because Maxim Trader achieves revenue through the number of lots traded and trading profits. This creates a win-win situation through a fair system that yields profits for both parties.

2、Cashback Rewards

Maxim Trader gives rebates, often in the form of monetary rewards and incentives for our affiliates. The increase in revenue allows liquidity to be channeled towards marketing campaigns that will evidently generate more leads and business back to Maxim Trader. Our clients are happy, our affiliates are rewarded and company expands.

3、Listing Strategy

As do all financial giants, the eventual goal is towards listing. With the capital raised, the positive growth on financial statements, the profitable trade history on our technology and the mustered support of all partners through the Consortium project, listing will be a reality. By the provision of value to our clients, we are in turn rewarded with profits which are further ploughed back into the business and eventually allow all stakeholders, partners and clients to prosper.

4、Wealth creation

Wealth creation is a subject that intrigues most people and pervades their thoughts because whether we like it or not, money drives our lives and is a medium of exchange for basic needs to luxurious wants. Having interest in wealth is doing you a great service and finding Maxim Trader could possibly be the start of your financial career and freedom. The word create is defined as bringing something into existence. Wealth should be created and not competed for what already exists. Take a look around and you will notice the most successful business are built by creating value that is hard to compete with and was non-existent in predecessors. As a catalyst of chance, Maxim Trader has always adopted a forward looking attitude towards inducing change and creating more value for our clients, who form an integral part of our business model. With the Consortium project, clients are able to develop multiple income streams that stem from an all rounded trading experience.

THE TIME IS NOW

In this time of extreme volatility and global economic dislocations as seen by the mind-boggling public debts in both the Eurozone and U.S., the time to made superlative profits is now. After all, Baron Rothschild, an 18th century British nobleman and member of the Rothschild banking family, is credited with saying that

"The time to buy is when there's blood in the streets."

So wait no longer.

2013年1月24日,第十一届上海理财博览会暨第三届上海企业金融服务论坛在上海展览中心顺利闭幕。尽管今天遇到了阴雨天气,却难挡投资者对博览会的热情和关注,此次展会的三天时间里共吸引了约17万市民前来观展,较去年上涨超过13%,再次创下了十一年来的历史新高。

此次博览会在规模上也创下了历年之最,展会面积超25000平方米,参展机构近300家,与去年相比分别有25%和30%的涨幅。同时,机构的构成方面更有了很大的变化。一方面,非上海本地的国内外参展机构纷纷慕名前来。原本历届博览会都是以上海本地金融机构为主,但本次博览会却有近6成来自非上海本地的公司,可以说正体现出上海在自贸区建立以后,作为日益成熟的国际金融中心,其吸引力和未来潜力都是巨大的。

这次上海金融博览会是公司成立以来参加的最成功的一次展会。我们的服务以及专业知识吸引了无数的新老客户。马胜在其成长的道路上又迈了关键性的一大步!马胜具有革命突破性意义的业务模式创造了空前的客户兴趣。来自中国各地以及各个年龄阶层的客户都积极询问与投资。

马胜深为我们独特、领先的会员发展会员模式、外汇交易的创新产品、以及马胜会员俱乐部-和ICE(信息-商务-教育)概念而感到骄傲与自豪!马胜一直强调投资者个人投资技能的提升、以及每天手牵手的交易方式,创造业内无与伦比的投资利润!

同时,马胜在金钱豹酒店设宴款待来自世界各地的客户和伙伴!公司原本只设定了不到400个座位,但是晚宴现场却来了差不多600位宾客!这是完全超乎马胜想象的,但是也再一次证明了马胜强大的凝聚力与向心力!

The 2013 Shanghai successfully opened on November 24th. Despite the rainy weather, visitors showed tremendous interest. The exhibition attracted over 170,000 people in only 3-days, both the highest turnout to date and 13% more than last year.

This exhibition was the largest ever in other ways, as well. The expo covered 25,000 square meters with nearly 300 companies, representing even larger increases from previous years' events. Where previous years were dominated by Shanghai's financial institutions, at the 2013 event roughly 60% arrived from outside the city. Shanghai's new "Free Trade Zone" combined with its status as an existing international financial center has created tremendous untapped potential for growth.

For Maxim Trader the event was even more successful – in fact the MOST SUCCESSFUL expo the company has EVER attended. NEVER BEFORE have our services and expertise been sought out by so many current and potential customers. Throughout the event it was clear that Maxim Trader has passed a TURNING POINT in our expansion. Our breakthrough business model has created such a big impact over investors from many places in China covering all different ages!

We pride ourselves as the pioneer in combining a unique member-based model together with product innovation in Forex Trading and a Maxim Premier Club - ICE Concept (Information-Commerce-Education). Our emphasis is on individual skills upgrading and daily trading hand holding approach to make profit that is unparalleled in the industry.

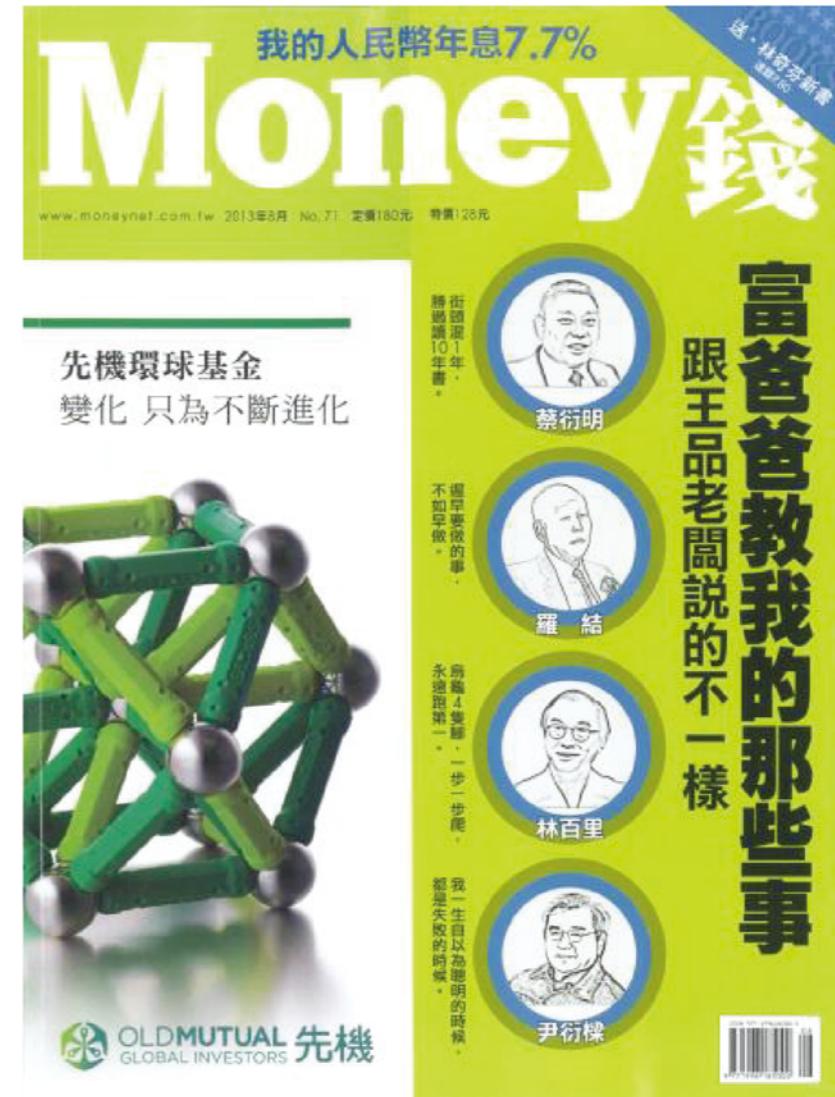

Our unique success at the expo was especially clear at the MAXIM TRADER GALA DINNER, where attendance exceeded all expectations. In all, having expected a large crowd of 400, we were fortunate to have 600 guests join us

马胜金融集团的基金经理有权直接在买入/卖出指令的市场上出价和报价，相当于流动资金提供者的角色。出价/报价和有限指令相似，是用一个特定或更好的价格来买入或卖出货币。由于全部出价/报价是直接下单到市场上，它可以被其他流动资金交易商买下，让我们的基金经理避免点差成本。此外，马胜金融集团的基金经理可以指定一个时间(有效至取消/有效期/有效至)让系统自动处理好该项指令。

5. Liquidity Providing

Our fund managers can place bids/offers in the market.

The place bid/ask type orders allow fund managers to act as liquidity providers by placing individual bids and offers, right into the market. Bids/Offers are very similar to limit orders and are used to buy or sell a currency at a specified price or better. In addition to limit orders, Bids/Offers have several advantages. As all Bids/Offers are placed directly in the market, they can be taken by other liquidity consumers, thus allowing our fund managers to avoid a spread cost. Additionally, our fund managers can specify the time period (Good Till Canceled/Good For/Good Till) allowed for the system to process the order. All together, these features make Bids/Offers valuable tools for intraday trading.
